*EU Energy and Climate targets for 2030:
Enhancing the contribution of natural gas*

Jérôme Ferrier
President IGU

IGU is the voice of 95 % of the Global Gas Market

91 Member Countries, 43 Associate Members

The *Triple 20* EU Energy target for 2020

Reduce greenhouse gas levels by 20%

Estimate in 2020: -24%

Increase share of renewables to 20%

Estimate in 2020: 21%

Reduce energy consumption by 20%

Estimate in 2020: -17%

The UK Emissions Performance Standards (EPS) *Energy Bill 2012 - 2013*

- **EPS requires that any new coal fired power plant demonstrate CCS on at least 300 MW of the proposed generating capacity**
- **Sets a CO2 emission limit at 450 g/kWh until 2045**
- **Guarantees stability of emission regulation until 2045 (grandfathering)**
- **EPS complements the economic signals provided by the Carbon Floor Price and, when applicable, the feed-in electricity purchase tariff with Contract for Difference (CFD)**
- **EPS gives incentives to « Good Quality » CHPs, by discounting the volumes of CO2 saved in the heat production by displacing other fossil fuels**

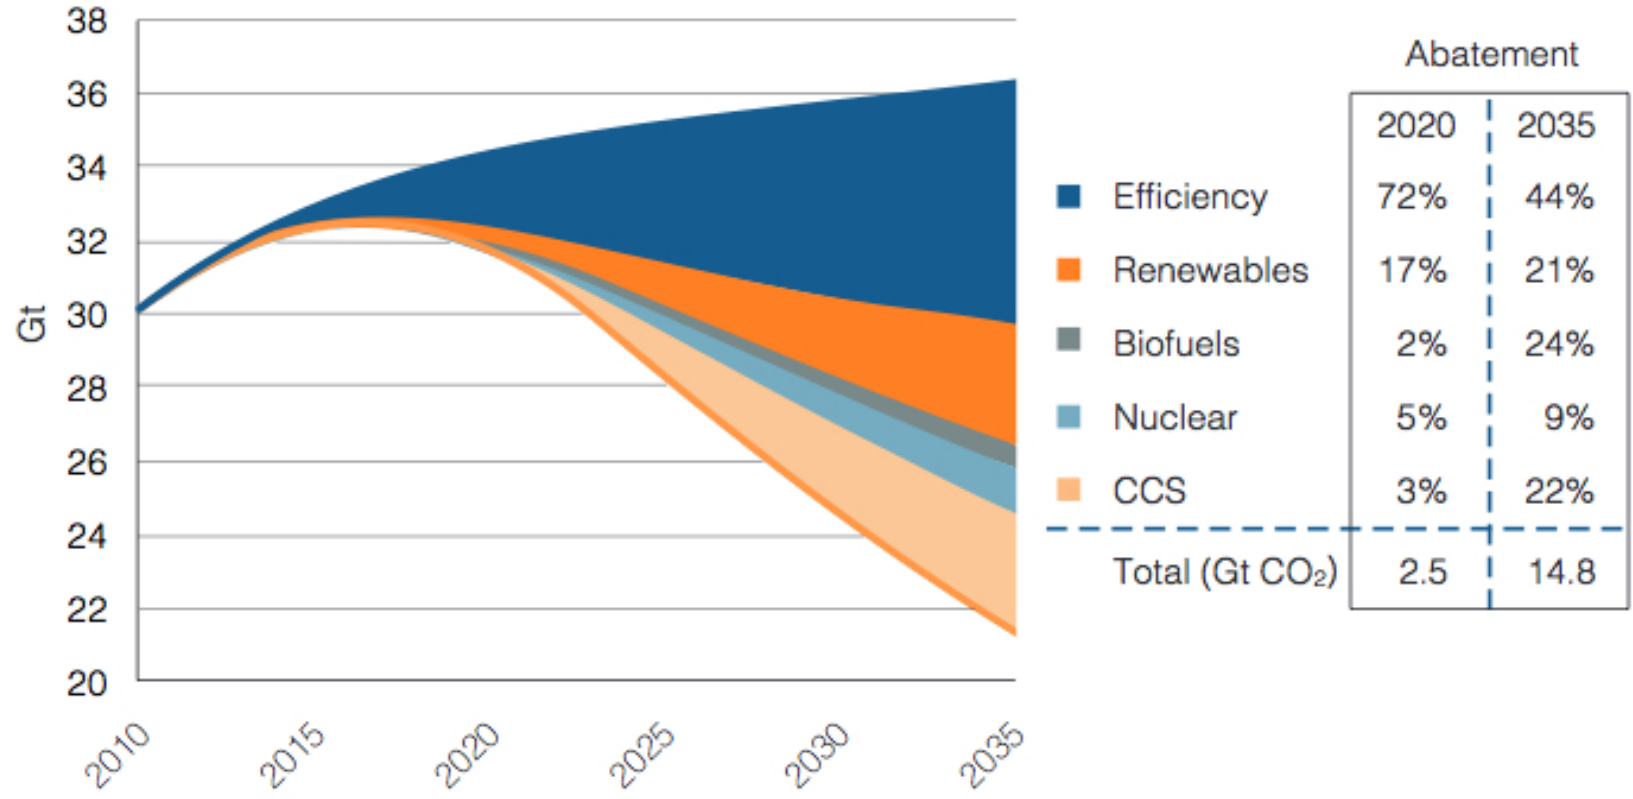

Average annual increases in Renewable based Power capacities

* Excludes capacity that directly replaces retired capacity of the same technology type.
