

Norwegian gas in a European perspective
– acting upon climate change

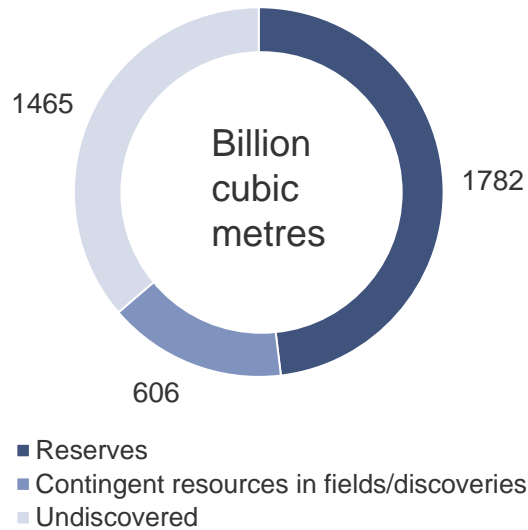

IGU Diplomatic Forum, Madrid 22 November 2017

Norwegian gas is well positioned in Europe

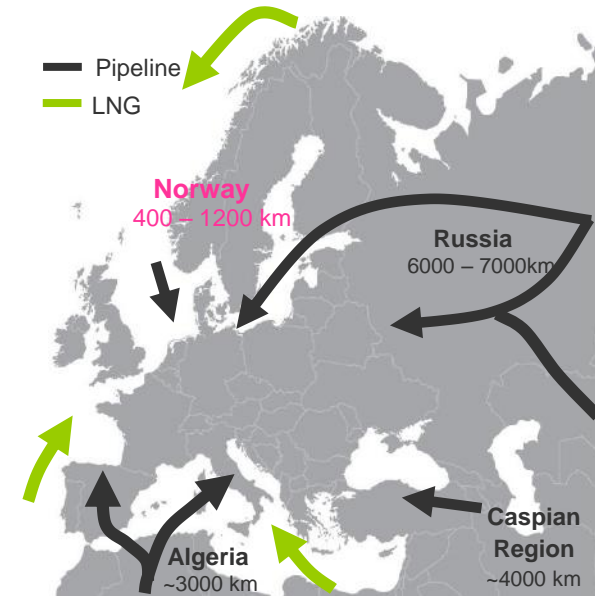

Access to an integrated and flexible pipeline infrastructure

Large gas resource potential on the NCS

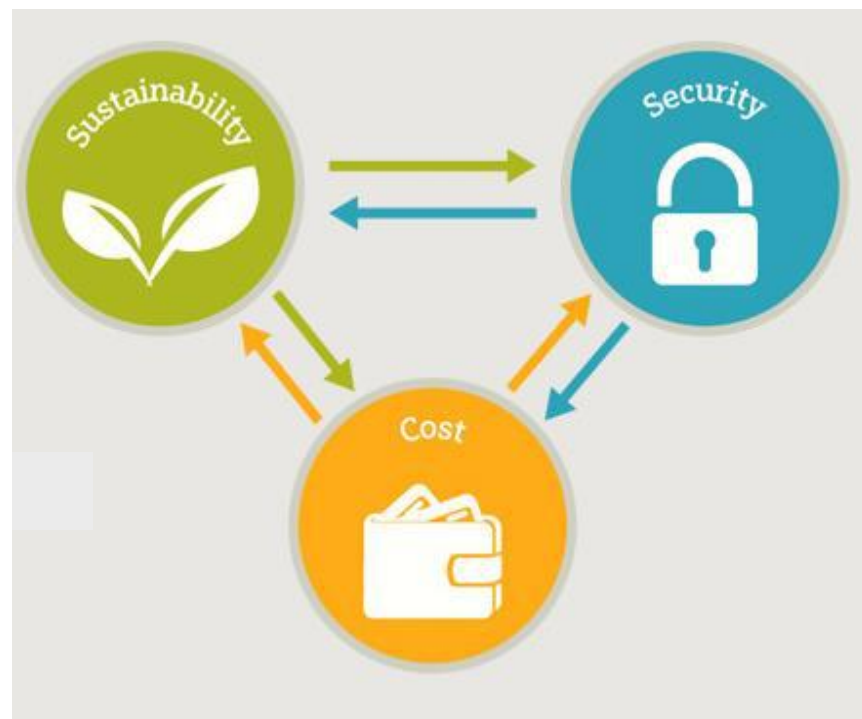

Proximity to markets

Europe's threefold energy challenge

- Security of supply
 - Short term: 'keeping the lights on'
 - Long term: ensure sustainable energy supplies
- Competitiveness
 - Securing energy at an affordable price
- Sustainability
 - Limit greenhouse gas emissions compared to 1990

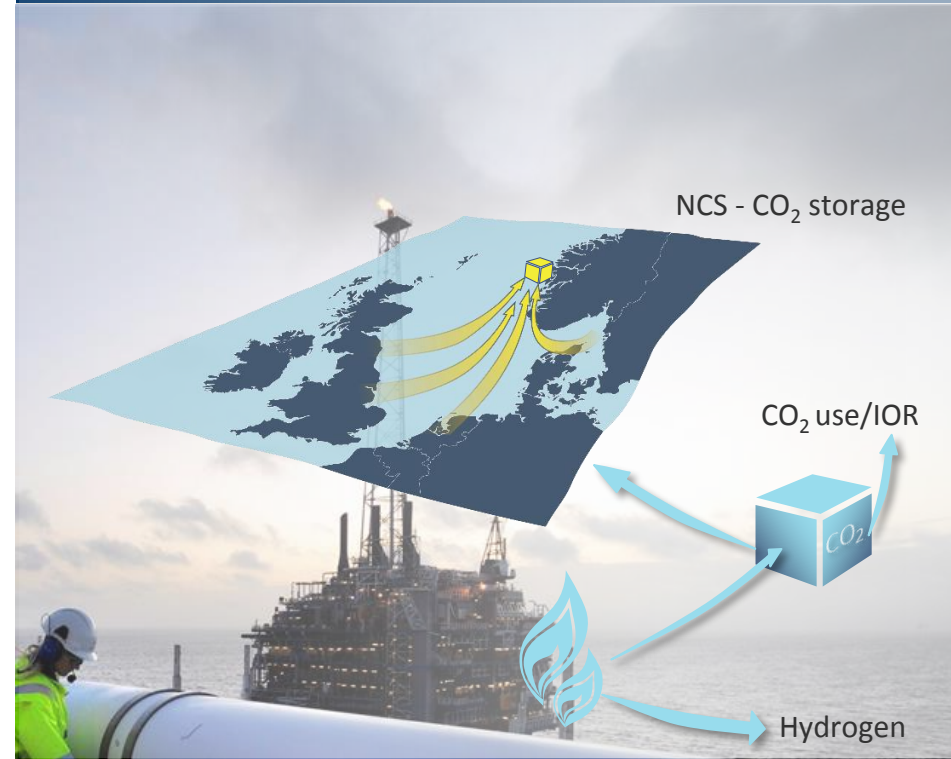

Acting upon climate change

PROFITABLE RENEWABLES BUSINESS

NEW LOWER CARBON BUSINESS OPPORTUNITIES

Natural gas a future source of energy

- Available, affordable and competitive
- A low carbon solution supporting climate ambitions

There's never been a better
time for **good ideas**

Norwegian gas in a European perspective
– acting upon climate change
